Bartosz Lipinski has nine years of experience in structural analysis, field investigation, remedial repair design, and construction observation of distressed and nonperforming structures and structural components. He has performed field investigations in the areas of structural condition surveys and documentation, mapping of concrete cracking and distress, and structural assessment of roof trusses.

A structural analysis expert, he specializes in load path determination, calculation review, and finite element modeling of existing structures and structural components. His portfolio of work has consisted of complex, large-scale buildings with a focus on structural capacity, foundation design, concrete slabs, light-gauge metal cold-formed roof trusses, slab punching shear, and facades. For structural related problems, he has provided litigation support including deposition reviews, construction timelines, and review of drawings and specifications.

Prior to joining RRJ in 2009, he worked as an intern at a national structural engineering firm gaining knowledge in structural design of healthcare facilities and long-span structures. He was involved in the design of steel framing and concrete floor diaphragms for a high-rise hospital and steel trusses for a convention center. Previously, he interned for a major refinery processing company providing structural review of modular structures.

■ EDUCATION

Master of Science in Civil Engineering, 2008
 Specialization in Structural Engineering
 University of Illinois at Urbana-Champaign

Bachelor of Science in General Engineering, 2007
 Specialization in Structural Engineering
 University of Illinois at Urbana-Champaign

■ REGISTRATIONS | CERTIFICATIONS

Licensed Professional Engineer in Illinois
 Licensed Structural Engineer in Illinois
 Construction Documents Technologist (CDT)

■ PROFESSIONAL AFFILIATIONS

American Institute of Steel Construction (AISC)
 American Concrete Institute (ACI)

■ PRESENTATIONS | PUBLICATIONS

"Observations of Light-Gauge Metal Roof Trusses"
 co-author and poster presenter, 2015 Structures Congress, Portland, OR, April, 23, 2015
