George Mulholland is a licensed Structural and Professional Engineer with 30 years of experience specializing in the evaluation, investigation, and repair of distressed facades, buildings, and structures. His portfolio has encompassed cast-in-place, precast, and post-tensioned concrete, masonry, steel, and timber structures with a specialization in parking garages.

He has served as Project Manager on numerous investigation projects utilizing the latest techniques and testing approaches, ranging from exterior facade and masonry wall evaluations to concrete deterioration, steel corrosion, and other structural performance-related problems and collapses. His investigative responsibilities consist of structural component surveys, structural strength evaluations, nondestructive testing, building code compliance, field testing, and material sampling. Project investigations have included destructive openings; concrete crack and delamination mapping; steel corrosion, waterproofing membrane, and masonry wall evaluations; and exterior wall critical examinations. He has extensive knowledge of remedial design approaches for rehabilitation, durability, and strengthening of structural framing components and connections to prevent, manage, and control air, water, and vapor migration of building envelopes, and historic facade restoration.

Mr. Mulholland has performed structural analysis, finite element modeling, nonlinear analysis, and structural peer reviews on a range of building types.

With his extensive knowledge of structural and facade assessments and repair, he has provided litigation support and served as an expert witness on related failures.

■ EDUCATION

Master of Science in Structural Engineering, 1988
University of Illinois at Urbana-Champaign
Bachelor of Science in Civil Engineering, 1986
Iowa State University

■ REGISTRATIONS

Licensed Structural Engineer in Illinois
Licensed Professional Engineer in Arizona, Illinois, Iowa, Missouri, and South Carolina

■ PROFESSIONAL AFFILIATIONS

American Society of Civil Engineers (ASCE)
Structural Condition Assessment and Rehabilitation of Buildings Committee, Chairman
Structural Condition Assessment of Existing Structures Subcommittee, Chairman
Condition Assessment of Building Envelope Subcommittee, Chairman
Precast/Prestressed Concrete Institute (PCI)
PCI Building Code Committee
Structural Engineers Association of Illinois (SEAOI)
American Institute of Steel Construction (AISC)
International Concrete Repair Institute (ICRI)
Chicago Chapter, Director

GEORGE R. MULHOLLAND, S.E., P.E.

Associate Principal
