Robert Haukohl has over 24 years of experience specializing in the investigation and repair design of distressed buildings and structures and collapses. At RRJ, he has performed numerous investigations and litigation support services for a wide range of matters.

Mr. Haukohl has conducted investigations of water infiltration problems through building facades, window systems, and roofing components. His investigative assignments typically include condition surveys, water tests, crack mapping, use of destructive and sounding methods, load testing, and component integrity evaluation. He is accomplished in all phases of construction administration, from on-site observation and assembling and tracking of bid packages to review of submittals and the implementation of quality assurance programs.

He has provided litigation support services in the areas of job history reconstruction, document reviews, construction delay claims, cause/fault determination, and authored opinions for depositions.

Prior to joining RRJ, he was a Project Manager at Madsen, Kneppers & Associates, Inc., a forensic engineering firm in Chicago. He gained significant knowledge and experience in facade evaluations and condition assessments of parking garages and other building types.

### ■ EDUCATION

Master of Science in Engineering Mechanics, 1992  
 University of Wisconsin

Bachelor of Science in Engineering Mechanics, 1991  
 University of Wisconsin

Additional Courses in Steel Design, Concrete Design,  
 and Soil Mechanics  
 University of Illinois at Chicago

### ■ REGISTRATIONS | CERTIFICATIONS

Licensed Professional Engineer in Illinois  
 Construction Documents Technologist (CDT)

### ■ PROFESSIONAL AFFILIATIONS

The Masonry Society (TMS)  
 Board of Directors  
 Chairman, The Existing Masonry Committee  
 Technical Activities Committee 2010-2011  
 Construction Practices Committee

Construction Specifications Institute (CSI)  
 Northern Illinois Chapter

## ROBERT C. HAUKOHL, P.E.

Senior Engineer
