Rebecca Booth has over five years of experience in the development of drawings and specifications for remedial repair programs to resolve nonperforming building enclosure systems and components. She has conducted investigations involving condition survey documentation and laboratory testing and performed field inspection and construction observation on select repair projects.

Her project experience has involved the evaluation of a range of materials and systems, including windows, curtain walls, roofing membranes, metal roofing, sealants, and exterior insulation and finish systems (EIFS). She has performed litigation support services related to construction defect claims.

Prior to joining RRJ, she worked as an intern at two architectural design firms, gaining experience in architectural design and historic preservation. She prepared architectural design drawings for commercial and medical interior spaces. As a design team member, she produced construction documents, code analysis, and presentation materials for the restoration of a historic Frank Lloyd Wright house. While pursuing her Master's degree, she served as a teaching assistant in the undergraduate architectural program at the University of Illinois at Urbana-Champaign.

■ EDUCATION

Master of Architecture: Focus in Design, 2013
University of Illinois at Urbana-Champaign

Bachelor of Science in Architectural Studies, 2011
University of Illinois at Urbana-Champaign

■ REGISTRATIONS | CERTIFICATIONS

Licensed Architect in Illinois

National Council of Architectural Registration Boards
(NCRAB) Certificate Holder

Construction Documents Technologist (CDT)

■ PROFESSIONAL AFFILIATIONS

Building Enclosure Council-Chicago
Secretary

The Construction Specifications Institute (CSI)
