Brian A. Glover

Document Production Manager

About Brian

Brian Glover has 19 years' experience as a Document Production Manager at RRJ, responsible for supervising, scheduling, and quality control of CAD documentation, presentation materials, and printing, and supplemental support for RRJ's firm-wide IT system. In addition, he is an FAA Certified (Part 107) Drone Pilot responsible for remote piloting of RRJ's registered commercial drone used across the firm's investigations and inspections projects.

He provides oversight of all document management from development and management of CAD Standards and enforcement to project close-out and back-up procedures. He has produced CAD documentation, modeling, and presentation drawings related to field investigations and repair designs for a broad range of architectural and structural projects.

He has comprehensive knowledge of CAD technology and serves as an industry beta tester of the latest Autodesk CAD software.

Prior to joining RRJ, Mr. Glover spent 23 years in the field of architectural design, gaining experience in all aspects of planning, design, project management, contract document preparation, and construction administration. He served in various roles as a Project Manager, Designer, and CAD Manager for several design practices in Chicago, Virginia, and New York City.

Education

Bachelor of Architecture, 1980
Pratt Institute

Certifications

Certified (Part 107) Remote Pilot
Federal Aviation Administration (FAA)

Certified sUAS Level I Thermographer
Infrared Training Center—United States

Teaching

Morton College, Cicero, IL
Adjunct Professor
CAD Productivity Semesters 1 & 2
Introduction to CAD
3D Modeling
Sheet Metal Production courses
